LA GRANJA BULBS AND TUBERS

Grown and Perfected Wholly in the United States by ELTWEED POMEROY, at DONNA, TEXAS

Fifth Annual Price List and Information Book for 1915-1916

Prepared in August, 1915

1. VITATTA HYBRIDS—The Finest of all Amaryllis. Flowers 8 to 10 inches across.
2. JOHNSONII—Glowing Crimson Flowers, white stripe down center.
3. EQUESTRE—Pure, Strong Orange Flower with green star in throat.

FOR SALE BY
FOREWORD

SATISFACTION GUARANTEED.

Most flower bulbs are semi-tropical. They flourish in summer over the whole United States because our summers are nearly tropical; but with few exceptions, they grow all the year around and reach their full luxuriance and beauty only in semi-tropical countries.

WHERE GROWN.

The Rio Grande Delta of Texas is from 300 to 400 miles south of San Diego, Cal., and New Orleans, La. It contains the southernmost point in the mainland of the United States. It is below the middle of the Sahara Desert, farther south than Cairo, Egypt; Delhi, India; Canton, China. Frost never enters the ground there. Flowers bloom all winter, producing as in all tropical countries, FLOWERS LARGER IN SIZE, MORE BRILLIANT IN COLOR, FINER IN TEXTURE, than if grown in a less favorable climate further north, and the bulbs CARRY THIS IMPROVEMENT FOR A LONG TIME WHEN FLOWERED NORTH.

THE SOIL.

Most bulbs require fine soil. The Rio Grande Delta is made from silt deposited by the river, and is of marvelous fineness and uniformity, making an ideal soil for bulb growing. There is not a stone in the Delta proper. It is exceedingly rich in potash salts which are the basis of all wood and tissue growth, and these make LARGE, FIRM, FINE-GRAINED TUBERS, STORED WITH VITALITY.

Some of these make LARGE, FINE AND BRILLIANT FLOWERS AND MANY FLOWERS.

La Granja is an irrigated farm, as the rainfall is insufficient, and when these bulbs are irrigated from the silt-laden, fertilizing waters of the Rio Grande, their good qualities are further enhanced.

FRESH BULBS.

Frost never enters the ground in this favored region. Further north, flower bulbs have to be dug in October or November or else they are frozen. The holding them out of the ground for six months is UNNATURAL and unless very carefully done, they either dry or rot from too little or too much moisture and they do LOSE VITALITY.

La Granja bulbs are stored in the ground. They are dug as wanted from January 1st to May 1st, and hence get into your hands in the shortest time possible after digging, and this means FRESH, UNROTTED, UNDRIED BULBS OF MAXIMUM VITALITY and hence GERMINATING QUICKER AND MORE, GROWING STURDIER AND BEARING MORE AND FINER FLOWERS.

PRICES AND VARIETY.

As the La Granja bulbs are stored in the ground, where, instead of losing value as when stored in a warehouse, they continually increase in value, they are offered at prices absurdly low, quality considered, and on a variety not usually seen in florists’ catalogs. Early in the season, your wants will be supplied from stocks carried by your own favorite seedsmen or florists, but later in season, or should you want any special bulb, orders will be filled direct from La Granja Farm at Donna, Texas, by parcel post. Payments had better be made to your dealer, but can be sent direct if you will send his name.

DELIVERIES.

A few bulbs and tubers are so large and heavy that they will have to go by express, which the buyer pays; such few are marked “N. D.” (Not delivered.) On everything else, the prices are delivered.

PAYMENTS.

Bookkeeping and collections are expensive. The very low prices in this catalog are based on not having this expense. Kindly remit with your order to your dealer or to us. This rule is invariable for parcel post packages. Large express or freight shipment can be sent C. O. D. if from a third to half of total is remitted with order.

SATISFACTION.

Is guaranteed, but the rare complaint should be sent within five days of receipt of goods or we can not rectify it. On shipments direct from La Granja we frequently put in some new bulb or tuber and should you find such in your package, accept with La Granja’s compliments and when it flowers, we would be glad to hear how it does.

VISITORS.

Are always welcome. Drop a postal or telegram stating date of arrival. You will be met at station and usually Mr. Pomeroy can arrange to be home and show you over La Granja in person. Many interesting plants not grown elsewhere can be seen there. During their season, La Granja usually has ripe fruits beginning with strawberries from January to June, blackberries and dewberries in April, loquats in May and June, peaches and plums in May and June, grapes in June and July, Guavas and figs from July to December, papayas and bananas same period; sisyphus, Japanese persimmons, sapatas and probably avocados in fall, and oranges, grapefruit, lemons, limes and kumquats in fall and winter. Also some new fruits.

CONSERVES.

For four years La Granja farm has made an increasing quantity of unusual and delicate conserve, such as Roselle jelly, jam and drink, kumquat preserve, guava jelly and preserves, ponderosa lemon marmalade, etc. Last season, the shipments ran up to two or three tons. These are made on the farm from fruit grown on the farm and contain nothing but fruit juices and sugar properly cooked. Taking my assortment, I will give you $5.75 for $5.00, and $12.00 for $10.00, express not prepaid.

Dean Hole once wrote: “After four score years, I maintain there is no recreation which brings so much happiness and brightness into a man’s life as the recreation of horticulture.”

I thoroughly endorse this sentiment and if this catalog and the plants can aid even a little in making your recreation, a true recreation of health, joy and refined pleasure, it will have satisfied

Your Well-Wisher,

Eltweed Pomeroy.

Copyrighted 1915, by Eltweed Pomeroy.
CALIFORNIA TREES. All on Sour Orange Roots, SELECTED BUDS.

%ths CALIPER AND UP

....Pomelos, Marsh Seedless
....Lemons, Eureka
....Lemons, Lisbon.
....Oranges, Washington Navel,
....Oranges, Valencia Late

Total at $0.80 each, $85.50 100 $

%ths CALIPER AND UP

....Pomelos, ...marsh Seedless,
....Lemons, Eureka,
....Lemons, Lisbon.
....Oranges, Washington Navel,
....Oranges, Valencia Late

Total @ $1.10 each, $10.50 dz., $75.00 100 $

Rafit Seedless Lemons, %ths Caliper & up. @ $1.25 each, $12.50 dz., $100.00 pr. 100 $.

four Orange Seedlings @ $3.50 pr. 100, $25.00 pr. 1000 $.

MissionOlives, @ $1.00 each, $10.00 dz., $75.00 pr. 1000 $.

Selected Buds for budding California Varieties at $2.00 per 100, $25.00 per 1000 $.

I will make the above prices till the trees I have contracted are sold and then prices will be advanced, probably by Dec. 1, 1916.

RECORD-PEDIGREED TREES.

....Pomelos, Marsh, from Lyman V. V. Brown, Esq. Buds from trees with 7 years record, production over 3,800.00 per acre per year for not less than 5 years. @ $2.50 each, $25.00 pr. dz., $250.00 pr. 100 $. 

....Lemons, Eureka. Buds from trees with 4 years record. Production not less than 2,600.00 per acre, per year, and often over 4,000.00. Product not less than 90% fancy and no culis. @ $2.50 each, $25.00 pr. dz., $250.00 pr. 100 $. 

....Oranges, Washington Navel. Buds from trees with 1 year record, production not less than 1,600.00 per acre, per year @ $1.75 each, $17.50 pr. dz., $175.00 pr. 100 $. 

....Oranges, Valencia Late. Buds from trees with 1 year record, production not less than 1,600.00 per acre, per year @ $1.75 each, $17.50 pr. dz., $175.00 pr. 100 $. 

Seed of above limited. I reserve right to cancel orders if stock is sold out.

FLORIDA STOCK—BICKLEY AGENCY.

CERTIFICATES.—Such is the high quality of the BICKLEY trees that orchards in Florida, planted with them, command a premium when selling. As a proof of such planting, a certificate is given anyone planting an hundred or more Bickley trees and on request, with a statement where the trees are to be planted, the name of the grower, I will issue such a certificate. I have the exclusive agency for Bickley trees.

ROOTS STOCK.—On sandy soils, such as is most of our second lift, trees budded on Rough Lemon roots grow stouter and bear heavier. If ordered sufficiently in advance. I can get these trees on Rough Lemon roots but it is not necessary to be sent unless ordered specially.

%ths TO %ths CALIPER.

....Pomelos, Walters
....Pomelos, Inman Late
....Lemons, Seedless Villa Franca.
....Oranges, Parson Brown,
....Oranges, Pineapple.
....Oranges, Lime Gia Kong.
....Oranges, Tardiff.
....Oranges, King.
....Oranges, Dancy Tangerine.

Total @ $1.10 ea., $11.00 dz., $110.00 pr. 100 $.

%ths to 1 INCH CALIPER.

....Pomelos, Walters.
....Pomelos, Inman Late.
....Lemons, Seedless Villa Franca.
....Oranges, Parson Brown.
....Oranges, Pineapple.
....Oranges, Lime Gia Kong.
....Oranges, Tardiff.
....Oranges, King.
....Oranges, Dancy Tangerine.

Total at $1.30 each, $13.00 dz., $130.00 100 $.

TWO-YEAR BUDS 1 INCH CALIPER AND UP.

....Pomelos, Walters.
....Pomelos, Inman Late.
....Lemons, Seedless Villa Franca.
....Oranges, Parson Brown.
....Oranges, Pineapple.
....Oranges, Lime Gia Kong.
....Oranges, Tardiff.
....Oranges, King.
....Oranges, Dancy Tangerine.

Total @ $1.60 each, $16.00 dz., $160.00 pr. 100 $.

%ths TO %ths CALIPER.

....Lime, Tahiti Seedless.
....Tangelo, Sampson.
....Kumquat, Nagami or Ohlong.

Total @ $1.30 each, $13.00 dz., $130.00 pr. 100 $.

TO 1 CALIPER.

....Lime, Tahiti Seedless.
....Tangelo, Sampson.
....Kumquat, Nagami or Ohlong.

Total @ $1.60 each, $16.00 dz., $160.00 pr. 100 $.

The King and Tangerine Oranges, Limes and Kumquats, being of much slenderness growth, will not caliper as large as above but they will be trees of same age and strength.

IN BUCKEYE TREES.

The %ths Caliper are 4'-5' high, carries a 12 month bud on 45 month root; the %ths Caliper are 5'-7' high, carrying a 15 month bud on 45 month root; the 2 year buds are 5'-7' high, carrying a 24 month bud on 45 month root. Smaller and lower priced trees can easily be obtained but they are not as cheap.

OTHER FLORIDA TREES

SOUR STOCK, %ths to %ths CALIPER.

....Pomelos, Royal.
....Pomelos, Duncan.
....Pomelos, Triumph.
....Lemons, Kennedy.
....Lemons, Ponderosa.
....Oranges, Ruby.
....Oranges, Surprise Navel.

Total @ $1.50 each, $15.00 dz., $150.00 pr. 100 $.

....Pomelo, Foster, 3-8 to 3-4 caliper, at $1.30 each, $13.00 dz., $130.00 per 100 $.

....Pomelo, Foster, 3-4 to 3-8 caliper, @ $1.50 each, $15.00 dz., $150.00 per 100 $.

....Lime, Sour Rangpur, @ $1.50 each, $15.00 per dz., $150.00 pr. 100 $.

....Lime, Mexican or Key Seedlings, 2 years. @ 40 each, $3.50 pr. dz., $140.00 pr. 100 $.

....Lime, Persimmon Seedless. Only few obtainable. @ $1.50 each, $15.00 dz., $150.00 pr. 100 $.

WIND-BREAK TREES.

....Bamboo, Arundo Donax Roots. @ $10.00 pr. 100 $.
EUCALYPTUS

The most generally planted wind-break tree. Small trees, pot-grown, with dirt around roots.

- E. Radii, Flooded Gum, for low wet lands.
- E. Viminalis, Mann Gum, Prefers sandy dry soil.

Total @ 35 each, $2.50 dz., $15.00 pr. 100.

E. Rostrata in Lots from California @ $7.00 pr. 100.

PALMS Make fine wind-breaks. Small, pot-grown, with dirt around roots, easy to transplant, no set-back.

- P. Caricenianus, Great Ornamental.
- P. Reclinata, Quick Grower.
- Sabal Palmetto, Cabbage palm of south.
- Washingtonia Robusta, Fan Palm.

Total @ 35 each, $2.50 dz., $15.00 pr. 100.

DAMO ARGENTEA, Groves 35'-40' high.

- Rooted Canes @ 25c each, $1.50 dz., $12.00 pr. 100.
- Sycamore & R. Cedrus Exellent.
- Cypress, Excl., @ 50c each, 25.00 dz. $15.00 pr. 100.
- Chinese Arbor Vitae (Tsiushia Orientalis) 10'-20' @ 50c, $2.50 dz., $15.00 pr. 100.

SILKY FRUIT TREES

Pecans, Stuart, 4-6' @ $1.00 each, $10.00 per 12.
- English Walnut, 4-6' grafted on California Black, @ $1.50 each, $15.00 per 12 pr.
- Pines, White, Red, & Engelhard, 4'-6' @ 50c each, 25.00 dz., $25.00 pr. 100.
- Larches, Red Coulton, Honey, Jewell 4-6', @ 50c each, $2,50 dz., $25.00 pr. 100.
- Gums, Guineense, Tender, Large fruit, Grafted, @ 50c each, $4.00 dz.
- Palus Sellowiana, @ $1.00 each, 10.00 pr. 100.
- Logan, (Triboryta, japones) @ 50c each, 1.50 pr. 12.
- Sapota, (Casimiroa Edulis) 50c each, $5.00 dz.
- Popayas, (Carica Papaya) 75c each, $6.00 dz.
- Avocado (Persea Americana) Northrup @ $3.00 each.
- Grafted grape vines root R. X. R300, Variety Moscat, (Alexandra) 40c each, 1.50 pr. 12.
- Sandalwood, (Santalum Album) 60c each, $3.00 dz.
- Chocolate, (Theobroma cacao) 75c each, 1.50 pr. 12.

Texas, 0.R.

These ordered the above items from Elwtwood Pomyery and has paid on account $____ and agrees to pay the balance on delivery. This order is taken subject to conditions following and cannot be cancelled.

LA GRANJA

Established 1908

ELWHTWOOD POMEROY

NURSERYMAN

DONNA, TEXAS

Dear Sir:

This is the seventh year I have been bringing nursery stock into the Valley and each year has seen a wider and better selected range, greater care and better satisfaction to customers. This past summer, I made a trip to California to personally inspect the trees I expect to bring from there and to garner more information I have had several visits from large growers in both Florida and California. This added information confirms me in what I said a year ago on my order blank that.

CITRUS FRUITS ‘In the Rio Grande Delta are a success; with the right trees and proper care, they will be a permanent success,’ and to this I now add, ‘A BIG change has been made in the Citrus group. What are the right trees?

1st—LARGE TREES. Mr. Gilbert of the Buckeye Nursery in Florida, in a recent letter said, ‘An orange tree is no stronger than its root system. No matter how hard you try to produce good fruit, if you do not supply a good root system, the tree will not yield fruit results unless the roots have been well started. Some time ago, we planted a large number of trees, 2500 were small buds 2 to 3 foot grade; the remaining 1700, 3 to 4 ft. long going 3 to 7 foot, two year old buds. The third year after planting the trees from 3 to 4 ft. long were loaded with fruit, the remaining large ones yielding no fruit at all. The large trees cost more at first but have been far the cheaper.

2nd—BARE ROOT VS. BALLENGED TREES. Only trees grown in heavy clay soil can be balled. Such trees usually have a small root system and if they are transplanted, are slow growers and usually light bearers. Trees grown in sandy soil make great clusters of flowering feeding from the roots and if they are transplanted, grow rapidly and bear heavily. They are absolutely and I have no use for soft roots. If I start out, I will insist on seeing roots of the trees you buy.

3rd—RED SELECTION. I will not get trees from a nurseryman who cannot produce red and shade trees, ‘workers and not drones.’ Owing to the care given this point, I believe I am bringing into the Valley trees which are the cheapest or best bare roots. These trees are the result of rapid and varied selection work, more than has ever been done before. Further I believe the character and quality of the RECORD-FERREDGE trees which sell for $5.00 per 12, $4.00 per 100.

4th—ROOT STOCK. Never plant citrus trees grafted on trifoliate roots. They fail there the successful ground. I believe the Rough Lemon roots will be brought on order.

TIME TO PLANT. Do not plant till danger of frost is past. The nurserymen take this rapitly to the risk of freezing—you have to take it in all other winters. Full planting often means that buds start during some warm weeks and lack of buds are caused by a light frost. Also do not plant when the soil gets too warm, it is hard for the roots to penetrate the fibrous roots. This means not earlier than February 1st, and not later than March 21st, and better if between February 1st and March 15th. I place three orders between these dates. Have your ground ready and take stock on arrival.

4th—GUARANTEE. I guarantee to deliver liveable trees between Feb. 1st and March 21st. I do not guarantee those trees to live; that is up to you. Great care is used to deliver them in the best possible condition, and description. Should any prove untrue to name, I will either replace or refund the money but shall have no greater liability.

COMPLAINTS. If you think anything wrong with a shipment, notify me WITHIN TEN DAYS after delivery. I will make satisfactory complaints made later than ten days after delivery, are too late; most nurseries make this time five days.

TERMS. TEN PER CENT DISCOUNT on all orders received before Dec. 29th on California and Florida stock; if a third cash accompanies the order. Without your consent there will be a 10% deduction in all early orders. At that time, I can be sure of getting exactly what you want. Also finest and largest stock delivered on early orders.

No discount allowed on orders received after Dec. 29th and on later orders, the right is reserved to substitute equal value.

In all cases the balance is payable on delivery and if on notification you do not remit, you will not get return order. Goods delivered at Donna station with no charge for packing.

QUANTITY. Half dozen sold at 95c, 10 at 10.00 below wholesale or 85c each.
California trees can be assorted and also Florida trees.

PLANTING CONTRACTS. I am offering to take on a limited number of acreage plantings under three-year contracts. These may vary in size from one acre to thirty acres; plant and care till Feb. 1, 1915 and you have no other expense save taxes and water rates and I guarantee a 100% stand at end of time.

2nd—50¢ PER ACRE. You buy your trees from me, I will give early treatment for this.

3rd—$2.50 PER ACRE. For this, I will supervise all operations; you will have your trees on a day actual cost and 90% planning terms. I am glad to advise, plan and map grounds for planting at $25.00 per day.

Yours for Valley improvement.

ELWHTWOOD POMEROY
CANNAS

Formerly cannas were grown for foliage, which is strikingly handsome, but their flowers were inconspicuous. In no other flower has there been such a rapid development. They are the finest bedding plant there is. They have flowers of great size—some 8 inches across—of lovely shape, rivalling orchids in beauty of outline and of colors wonderfully brilliant, deep, rich, and satisfying, and these flowers BLOOM and BLOOM and BLOOM.

There are many varieties; La Granja is growing over a hundred, and where the finer ones become known, they capture the public’s heart. No garden is complete without its collection of cannas and a garden may be complete with cannas only.

TOO MANY VARIETIES.

The increase in size and beauty of cannas has been so rapid that many duplicates have been put out. Buyers are often disappointed by getting an old canna under a new name and florid description. Everyone that seems at all meritorious is tested out at La Granja, and if a duplicate, or so close as to be practically a duplicate, that fact is told here, and a really scientific classification is given so that a buyer can select what he wants.

CLASSIFICATION.

First. By color of flowers.
Second. By leaves, whether bronze or green, and by height.
Third. By character of flowers in which there are two main varieties, though these melt into each other. The orchid canna has one or two flowers opening mature, drop off and others open. These are the largest flowers, some being 8 inches across. They always grow on large plants from 5 to 6 feet high.

In the truss canna, the individual flowers are smaller, but more open at a time, making a truss of bloom of great effectiveness. Then there is a third class of foliage canna with inconspicuous flowers.

The older cannas have narrow petals, one-half to one inch broad and of rather flimsy substance so as not to stand the wind. The signs of breeding in a canna, showing that it is one of the new and fine ones, are broad petals from one and one-half to and one-half inches broad and rounded, and of substance which will stand the wind. Also they should drop the dead florets, but this is rare.

CULTURE.

Nothing could be easier: A warm soil, plenty of water, a place in the sun. Manure is good, but not necessary. Drainage is good, but not necessary.

DESCRIPTIONS

RED ORCHID FLOWERS.

Green Foliage, Height 5 to 6 Feet.

LOUISIANA. Flower a deep, vivid crimson, the PENNSYLVANIA. darkest and bluest of this class and one of the largest, usually 6 to 7 inches across and with crinkly edge and silky sheen. These two alike.

MRS. KATE GRAY-JOLIET. Same as preceding, but flowers a scarlet red occasionally with orange streaks. These two alike.

PRINCE WEID. Same as last two, but flowers UNCLE SAM. have more substance, and plants are more floriferous. Generally Prince Weid has a more yellow tinge in its flowers than Uncle Sam.

ATALANTA, PARTHENHOPE. Flowers so brilliant an orange red as almost to be classed as orange, a vivid flame color. These two alike.

MRS. KARL KELSEY. The flowers in this are orange-scarlet, flaked with gold, and very large.

SPLENDOR. Very large flowers of a glorious deep scarlet, often 7 inches across and of strong substance and well spread out.

MRS. WOODROW WILSON. Very large flowers of rich, soft, crimson-pink, with broad, over-lapping, rounded petals. This has not yet flowered, but is said to be unusually fine.

WINTZER’S COLOSSAL. This canna has the largest flowers of any, as they are often 8 inches across. It is a deep, rich crimson, but the petals are so large they hang down.

FIREBIRD Great claims are made for this new (OISEAU DE FEU). French canna. Large petals 2½ inches across. Large flowers 7 to 8 inches across, of perfect form and sturdy substance. Color a clear, glistening scarlet without streaks or spots. It is being grown at La Granja, but has not yet flowered.

RED TRUSS FLOWERS.

Green Foliage, Height 3 to 5 Feet.

GRAND CHANCELLOR The darkest red of all BULOW, MEPHISTO. cannas. Some call these maroon, but they are not purple enough, but a pure,
BLACK PRINCE. Flower almost as dark as Mephisto and as rich and vivid.

METEOR, JEAN TISSOT. These have a rich DR. ROBERT FUNKE. shade of scarlet, a large flower, and a large truss born well above foliage. They are alike, save that Meteor has a trifle larger flower.

CRIMSON BEDDER. Same as preceding, save that DUKE OF MARLBORO. flower approaches to orchid type and fewer appear in truss, but both are very floriferous and make fine bedding canna. Very similar to Mrs. Kate Gray and Joliet, save plants do not grow as high.

PILLAR OF FIRE. Same as Meteor, save that SENATOR VIGER. color is more scarlet or orange PATRIE, BEACON. and very fiery. Four alike.

J. D. EISLE. Same as preceding, save color still more orange or yellow, and lighter and more fiery.

RED TRUSS FLOWERS.

HENRY GEORGE. Dwarf canna, fine for edging. PHILADELPHIA. ing of beds. Flower shade of Louisiana and Jean Tissot, is of good size and in large trusses held well above foliage.

RED TRUSS FLOWERS.

Bronze Foliage.

RUBIN. Height 3½ feet. Truss flower of moderate size, but large truss of rich, deep crimson, nearly as dark as Black Prince. Fine, dark bronze leaf. Profuse bloomer and flowers of sturdy substance.

NEW YORK. Height 5 feet, foliage rich plum bronze. Flower, large and a rich clear crimson, similar in shade to Louisiana.

EGANDALE. Height 3 feet. Flowers a bright, current red, different in shade from any other canna. Flowers small, but held in erect, full trusses.

PRES. MEYER. Height, 4 feet, color a rich cherry carmine.

WM. SAUNDERS, CONOWINGO. Height 3½ feet. Flower medium size, but many on a truss and a pure vermillion red without orange streaks, rich and lovely—three alike.

KING HUMBERT. Height, 3½ feet. Flowers almost as large as the largest orchid canna, 5 to 6 inches across with broad, rounded petals and large truss. Color a glowing scarlet or orange red, often streaked with gold. Growth strong and vigorous and leaf a rich red bronze. One of the finest and most popular canna.

PACIFIC BEAUTY. Same as King Humbert, save leaf more pointed. Flower smaller and more orange.

MAJESTIC. Flowers small, but many, in an erect, slender truss and a bright vermillion red. The leaves are long, pointed and of a strong red bronze with deeper edges. Also a foliage canna.

ORANGE FLOWERS.

INDIANA. Height 5 feet, green foliage. Orchid flower of a fiery, but velvety orange, born high above leaves; a real Oriental or yogi color.

WYOMING. Height, 4 to 5 feet. Blue bronze foliage. Orchid flowers of great size and a true orange without red, rich, strong and velvety. I consider this one of the finest bronze leaf canna.

DAVID HARUM. Height 4 to 5 feet. Red bronze AMERICA. foliage. Flowers smaller and a fiery reddish orange often streaked with deeper orange or red. These two alike.
CANNAS—Continued

YELLOW TRUSS FLOWERS.

Green foliage. Height 3 to 4 feet, where not mentioned. Graded from most orange to least orange. There are no strictly orchid flowers in yellow canna, though Charles Lutz, Austria, etc., approach.

GOLDEN DAWN. Medium size, narrow petalled flower of a vivid orange yellow, yet not an orange.

GUSTAV GUMPPER. Height 2½ to 3 feet. A small flower, never opening wider than 3 inches, but many on a truss and a profuse bloomer, so the effect in a bed is always fine. Color a fine orange yellow with some red spots in throat.

KARL MERCK, WM. BATES. Larger flowers often 4 to 5 inches across opening wide and with broad, rounded petals of a clear lemon yellow, with streaks of dull pink from throat. Two alike.

DIRECTOR HOLTZ. Stiffer and wider flowers, often 5 inches across, narrower petals, and with lines of brilliant red spots from throat.

CHARLES LUTZ. The largest yellow canna I have seen, 5 to 6 inches across with broad, rounded petals 1½ to 2 inches across. A clear, fine lemon yellow.

JANE ADDAMS. A very pretty canna, but not worth the booming it has had and its high price.

Medium flower, about 4 inches across, of a clear, fine lemon yellow.

AUSTRIA, BURBANK. These two are old, but always satisfactory canna. In these the flower opens like a lily with stiff petals and is 4 to 5 inches across, of a fine, bright lemon yellow with few red spots in throat. Profuse bloomer.

MERCEDES. Same as preceding, save that the flowers often turn white, as they grow old.

RICHARD WALLACE. Flowers of a still lighter QUEEN OF YELLOWS. shade of yellow verging on the cream, good size, often 3 inches across, but with narrow petals. Occasionally spotted with pink.

DR. NANSSEN. Height 2 to 2½ feet. Color a soft, pale yellow, almost an ecru and with no red in it. Not a large flower, but many in a truss and free-flowering, admirable for a dwarf canna.

CREAM TRUSS FLOWERS.

Green Foliage, Height 3 to 4 Feet.

KATE F. DEEMER. Truss flower, 4 to 5 inches JOHANNA KANSLER. across with rounded petals. K. F. D. is the deeper color, being a strong ecru or cream, almost a yellow. If planted on water, its flowers will turn a dull red, as they open, and its buds are a fine brown. J. K. has flecks of pink in throat.

Canna—Maros

NIEMEN. Same as preceding, but lighter in shade PETOFI. so that Petofi is almost a white, with faint dashes of pink in throat.

WHITE TRUSS FLOWERS.

Green Foliage, Height 3 to 4 Feet.

MONT BLANC IMP. Flower larger than Moon- FRAU MARIE NAGEL. light with broader, rounded petals and nearer a pure white. Weak and rather irregular grower.

MAROS. Flower still larger with wider petals and less creamy, more white and more open clusters. Growth upright, lighter, more strong and healthy.

EUREKA. Largest white canna I have seen, often 5 to 6 inches across. Like all white cannas, color
a nearly pure white in cool, cloudy weather, and a creamy white in hot, sunny weather. Often has flecks of pink in throat. Good grower and flowerer.

BLANCHE WINTZER. A new and much-vaunted white canna, which may be a little improvement over Mont Blanc.

PINK TRUSS FLOWERS.
Green Foliage, Height 3 to 4 Feet, Unless Mentioned.

WEST GROVE, LOUISE. Flower moderately large, 4 to 5 inches across, but with rather narrow petals. Large truss. Color, a deep cerise pink or faintly salmon pink. Very rich. Three alike.

Mlle. BERAT. Large flower with wider, more rounded petals and full truss. Color more of a rose pink, but still with trifle of yellow in it. One of the loveliest of cannas.

HUNGARIA. Dwarf, 2 to 3 feet high. Very large flower, 5 to 6 inches across, with broad, rounded petals of good substance and large truss. Color, a lovely rose or blue pink with gold in throat, shade of a Paul Neyron rose. I am doubtful whether this or one of the next two are the canna I admire most.

MRS. A. F. CONRAD. Large flower over 4 inches across, very broad, rounded and over-lapping petals, probably the widest petals of any canna yet on the market. Color a light, yellow pink, almost a mahogany brown in throat shading through the loveliest hues of soft, light pinks to an ecru at the edges.

LA DONNA, WAWA. Dwarf, 2 to 3 feet high. Flower same as preceding, save a little smaller, but still a large flower, and large truss. Color lighter and more yellow in it and very lovely. Two alike.

PINK TRUSS FLOWERS.
Bronze Foliage, Height 3 to 4 Feet, Unless Mentioned.

SHENANDOAH. Rather small, salmon pink flowers, and red bronze foliage. In cool weather the color becomes almost a rose pink and in hot a very decided salmon.

WABASH. Height 4½ to 5 feet. Flowers large, often 5 inches across, but with narrow petals. Color, a true, deep rose pink or blue pink. Bluish bronze foliage.

PINK AND GOLD TRUSS FLOWERS.
Green Foliage, Height 3 to 4 Feet.

GLADIOFLORA. These two and the following UHLBERG, three all have truss flowers approaching the orchid in size, 4 to 5 inches across, with broad, rounded, over-lapping petals, 1½ to 2 inches wide. All are combinations of pink and gold, exceedingly lovely and gay. These two have the darkest shades, the pink being a deep, yellow pink or cerise, and throat and edgings of a strong lemon yellow, with a touch of orange in it making it a true gold color. G. is the older canna and U. is claimed to be more free-flowering. My observation does not sustain this claim, save in a small degree.

VENUS. Same as preceding two, but a lighter shade of both pink and gold in its makeup. A very lovely canna.

Canna—Gloriosa, Shorter; Karl Merck, Taller

ROSSINI. Same, but still lighter, till its gold is almost a cream and its pink is a faint and lovely salmon pink.
CANNAS—Continued

CZUCZOR. Same as Rossini, but its pink has no yellow in it and is a true rose or blue pink, though faint and lovely. Its yellow is often a cream.

ALBA ROSEA. A most unusual and lovely canna. Flower small with stiff, narrow petals, unlike other cannas and the loveliest shade of peach blossom pink, shading to creamy white ever seen.

RED AND GOLD TRUSS FLOWERS.

Green Foliage. Height 3 to 4 Feet.

CLAUDE MONTEL. Moderately large flower over 4 inches across with broad petals often hanging down. Color a deep, rich, blood-red or bluish red, with narrow gold margin and throat. Most canna reds contain orange, but this does not and is unusual, vivid, striking.

GLORIOSA. Medium flower, but large truss. Color a very deep, pure red with narrow margin of gold. Red darker than Claude Montel and as dark as Mephisto. A striking canna.

NIAGARA. Same, but shades are light, of both red and gold, and there is less red and more gold in flowers.

RED AND GOLD TRUSS FLOWERS.

Bronze Foliage. Height 3 to 4 Feet.

BRANDYWINE. Fine bronze foliage. Flower medium size with narrow petals. Color intense vinous red, mottled and edged with gold.

VERMILLION AND GOLD.

Green Foliage. Height 3 to 4 Feet.

ITALIA. Large flower, 5 inches across and nearly orchid. A burning, vermillion or orange red, spotted and flecked with gold.

GEN. MERKEL. Smaller flower, but larger truss, and colors more vermilion in red and orange in gold.

UNDINE. Dwarf, 1½ to 2 feet high. Very large, erect, free-blooming truss of flowers of mottled vermillion red and gold and much gold in its flowers. Very gay for bordering.

MME. CROZY. Same as Undine, save flowers are larger and fewer in truss and the gold is only in an edging around petals and not splotched over petals.

HALLEY’S COMET. Same, but larger plant; larger flowers almost orchid, fewer on truss, color a deeper red, though still a vermillion and edged with gold.

MARVEL. Flower a bright scarlet, edged with gold on inside of petals, and yellow, streaked with scarlet on outside, giving it an illuminated effect as of light, seen through stained glass. Medium flower, but large, full truss; luxuriant grower and bloomer.

YELLOW AND RED TRUSS FLOWERS.

FLORENCE VAUGHAN. Color, a bright yellow, CALICO. spotted with red, very gay. Flower small, but fair-sized truss.

DWARF FLORENCE. Same, but grows from 2 to VAUGHAN. 3 feet high.

QUEEN CHARLOTTE. Same as F. V., but flowers trifle smaller, but truss as large.

GLADIATOR. Best of group as the flowers are large with broad, rounded, overlapping petals; color a pure canary yellow, spotted with red. A profuse bloomer.

YELLOW AND ORANGE ORCHID FLOWERS.

Green Foliage. Height 5 to 6 Feet.

ALLEMANIA. Large flower, 5 to 6 inches across. Color a brilliant orange, spotted and flecked with an orange red.

FLAMBEAU. Same as preceding, save plants grow FREDERIC BENARY. taller and perhaps flowers trifle larger, and the orange is more vermilion and more fiery, and the yellow is an edging, around flower. One of the most striking cannas there is. Two alike.

STUTTGARTIA. Same as preceding two, save flowers perhaps a trifle smaller, and the orange is darker and almost a red and is splotched and marked with real blood-red and the back of petals are golden yellow with red spots.

**SPECIAL BARGAIN.**

In any large plantation, be as careful as you may, some varieties get mixed and rather than go to the expense of flowering and then transplanting, we give you the benefit of that labor in a very low price on mixed canna roots, some of which may be worth more for a single root than you pay per dozen.

- Mixed Reds, 75 cents per dozen; $3.50 per 100; $25.00 per 1000.
- Mixed Yellows, 75 cents per dozen; $3.50 per 100; $25.00 per 1000.
- Mixed All Colors, 60 cents per dozen; $3.00 per 100; $20.00 per 1000.

**FOLIAGE CANNAS.**

Six to Seven Feet High.

**FLASHLIGHT.** Leaves large and a soft green, has small erect trusses of a small, bright red and yellow flower. Strong grower and fine for a background.

**MAJESTIC.** Foliage bluish-green, lined with bronze, long-pointed leaves. Strong grower. Flowers in small, but erect, full trusses of small carmine red flowers.

**KING OF BRONZES.** Foliage a rich, red bronze and growth luxuriant, leaves with broad, rounded ends. Small flowers, but in trusses of fair size and pretty.

**MUSAFOLIA.** Height 7 to 8 feet. The tallest canna and rapid grower. Leaves a dark green, edged with purplish bronze and large, often 4 feet long. Admirable for a screen or background.
AMARYLLIDS

DESCRIPTION.

Amaryllis, usually called lilies, have bulbs with a sheath like an onion and not with scales like the true lily. Some are round, a few flattened, but most are oblong with a neck. Some are small, others very large, weighing several pounds. Some have flowers less than an inch across; others bear the most gorgeous of flowers, the aristocrats of the flower kingdom.

LEAVES.

Usually they have strap or sword leaves from 2 to 4 inches broad and from 2 to 6 feet long, often curiously curved and frilled. They are evergreen and ornamental. A few have leaves like an onion.

FLOWERS.

The flower stalk or scape grows from one side of the bulb and bears from 1 to 25 lily flowers of great beauty. Most of the sub-class of Amaryllis send up their flower stalk when there are few or no leaves, and if the season is long they will bloom again. The sub-class of crinums do not usually bloom till the leaf is fully formed. The flowers show many shades of gorgeous reds, lovely pinks, pure whites often with green touches and occasionally yellows and oranges with a rare shading towards lavenders and purples. I have not seen a blue.

HABITAT.

They are tropical plants, loving a warm soil, generally full sun and plenty of water, though few can endure water standing around their roots. Like most flowers, they must kill the frost, but unless the frost gets into the ground, the bulb is uninjured.

WHERE CAN BE GROWN.

Most varieties can be left in the open in Texas, Louisiana, Alabama, Georgia, etc. In the next tier of States north, they will need mulching during winter, but think this is all that is necessary as far north as Washington, Cincinnati, St. Louis, Kansas City, Further north and on high altitudes, they should be stored in a cellar or frostless place during the winter. But our southern summer are so tropical they usually do splendidly as far north as New York, Chicago, Omaha and still further north with care.

HOUSE PLANTS.

They are so easily grown and so ornamental even when not flowering, that they make fine house plants. Kelway of England, in his great catalog, says: "They are excellent greenhouse and splendid pot plants for amateurs, as they can be retained in the same pot for years, flowering each season without being repotted." Many florists are now growing them for the flowers, particularly the Crinums and Ixmenes, which produce lovely flowers in the hottest weather when there is a scarcity of flowers.

CUT FLOWERS.

They last a long time when cut, especially if cut when the bud has begun to open, and when carefully packed, can be easily shipped.

CULTURAL DIRECTIONS.

Very simple. Dreer says: "Any good garden soil will grow them, but preferably use two parts good fibrous loam to one part decomposed cow manure and sufficient sharp sand to make it loose and friable. Water sparingly till active growth begins, but when in full leaf, water liberally, taking care to give good drainage."

VARIETY.

Few know their variety. Amaryllis embrace the Amaryllis, some varieties of which are known as Hippeastrums, and some as Pancratiums, the Cri- num, the Ismene, the Vallotia, the Hippeastrums, the Hy- menocallis, Sternbergias, Nerines, Cooperias, Zephyrans, etc. La Granja now has nearly three score varieties testing out.

VALUE.

After testing for five years, I am confident that flower-lovers are only beginning to appreciate the beauty of this large and nearly unknown class of flowers. Ker of Liverpool, England, calls them "the most gorgeous and beautiful of all bulbous plants." Kelway, the largest plant and seed house in England, if not in the world, says: "These most handsome and brilliantly colored flowers are easily grown." Berger of New York City says: "The gorgeous coloring of these lily-like flowers, their dazzling beauty and lasting qualities, make them a gem in any garden." Burbank declares: "The Amaryllis is only one of the most magnificent of all growing plants." AMARYLLIS, VITATTA. These are the finest of all Amaryllis, taking their place beside the Auratum Lily and some tropical orchids as being the very crowning triumph of flower growing. The flower has six lovely petals of thick, crisp, velvety texture, they are rounded, wide and open wide, till the finest flowers are 8 and 10 inches across. The petals do not curve tightly back as in the Auratum Lily, nor remain nearly closed as in the trumpet of the Easter Lily, but just open wide. The colors are red and white, and the reds vary from a deep, vivid, glowing crimson, the color of arterial blood, up through fiery scarlet which burn resplendent to an almost true orange, the color of light and passion combined, then with less yellow and fainter, they shade into lovely pinks. The white is occasionally a true blue white or paper white, but often, it is a soft ivory, some- times almost an ecru.

As a rule, the larger the bulb, the larger will be the flowers and the more flowers will come, but no bulbs are sent out from La Granja unless they have flowered at least once and borne flowers of fine size, substance and color.

**KUNTHIANUM.** Called Confederate Lily. A larger plant than preceding, as leaves often grow 4 inches broad and 4 feet long. The flower stalk rises 2½ to 3 feet high, and is crowned with an umbel of 15 to 25 buds, of which there are from 3 to 6 in bloom all the time, and the cluster lasts a week or ten days. The flowers are trumpet shaped, hanging down in a lovely cluster; each flower is about 10 inches long and opens 3 or 4 inches. Its color is a soft, white-stripped on outside with a dull but rich, deep rose, fading inside into the loveliest sea-shell pink.

**AUGUSTUM.** Called Rio Grande Lily. This requires at least a year to get established before it will blossom. It is very large with leaves 5 to 6 inches broad and 4 to 5 feet long, widening in the middle. The bulbs are 2 to 3 inches in diameter and heavy. The flower stalks rise 4 to 5 feet high and have an umbel of 15 to 25 flowers with long, narrow, curling pink and white petals. They make a dazzling cluster 2 to 3 feet in circumference, and as only a few blossom at a time, I have had a stalk last ten days.

ZEPHYRANTHES. Bulbs from the River Plata in the Argentine Republic, which grow and flower very similar to a Crocus. It grows readily in the grass with round, narrow, grass-like leaves, perhaps a foot long, and a flower scape rising 2 or 3 inches above the leaves, and bearing lovely, Crocus-like flowers with central stamens of delicate yellow. They flower easily and frequently, and grow well in pots.

LONGIFOLIA. (Also called Atamasco and Treatia Alba). Called Fairy Lilies. White flower, perhaps 2 inches across, and very floriferous.

Price.

| Bulbs 2 to 4 inches circumference | 5c each; 50c per dozen; $3.50 per 100. |

ROSEA. Larger flower of a most lovely and delicate pink; does not increase so rapidly; a trifle more tender.

Price.

| Bulbs 3 to 5 inches circumference | 10c each; 75c per dozen; $5.00 per 100. |

MEXICAN EVER-BLOOM-ING SINGLE TUBEROSE

POLIANTHES TUBEROSA These come from the MEXICANA, high table-land of central Mexico. They have tall, stiff stems, flowers pure white, single, delightfully fragrant. They withstand all kinds of wind and weather, save hard frosts, commence to bloom in May, and are a mass of white till cut down by frost. They never blight and a mother bulb will send up from 10 to 15 flower stalks during the season. If the stalk is cut when the flower first opens and put in water, the flowers increase in size and whiteness and keep a week or ten days.

Price.

| Mother bulbs with from 3 to 6 small bulbs around them, 4½ to 7 inches circumference, 15c each | $1.25 per dozen; $8.00 per 100. |
| Large bulbs, 2½ to 4½ inches circumference, 5c each | 50c per dozen; $3.50 per 100. |
| Seed bulbs will not bloom for a year, 25c per dozen, $1.50 per 100. |

HEMEROCALLIS

DAY LILIES. An old-fashioned, but always lovely flower. From a clump of tall, graceful, grass-like foliage, a stalk shoots up bearing from 5 to 15 charm-
**FREESIAS**

A small bulb from the Cape of Good Hope. Planted in fall or early spring, it sends up a grass-like foliage and bears branching stems of fragrant white flowers, very lovely. Cut when first opened, they will last for days.

**REFRACTA ALBA.** This has pure white flowers with yellow spot in throat.

**Price.**
Mammoth bulbs, 2 inches and up circumference, 5c each; 40c per dozen; $2.75 per 100; $22 per 1000.
Large bulbs, 2 to 1 1/4 inches circumference, 4c each; 30c per dozen; $2.00 per 100; $18 per 1000.
Medium bulbs, 1 1/4 to 3 1/4 inches circumference, 3c each; 25c per dozen; $1.50 per 100; $10 per 1000.

**CALLA LILIES**

Wonderfully beautiful flowers needing a lot of water, but blooming easily, either in warm weather outside or as pot plants in house. Flowers 4 to 5 inches across, pure white with central pistil of yellow.

**AETHIOPICA.** Foliage green and arrow-shaped, flower stalks 2 to 3 feet high.

**Price.**
Large bulbs, 3 to 5 inches circumference, 15c each; $1.50 per dozen; $12 per 1000.

**IRIS**

Mr. Farr, in his catalog, has one of the finest descriptions of the Iris I have ever read and I quote: "The delicate and refined beauty of the Iris is hidden from the observer by more gorgeous and striking things, but to those gazing into the heart of the flower is revealed the rare beauty of its soft iridescence. Mysterious as the opal with its ever-changing fire, more wonderful than the orchid in its marvelous structure, ethereal as the rainbow glistening in the sun or smoky clouds at dusk, it leads you across the border into a wonderland of delight." Another season I hope to have many more varieties to offer; this season but one, but that one, the little known but very lovely bulbous Iris Hispanica Xiphium. These flower in May and June, require a sunny position, light and

**FULVA OR TAWNEY** Blossoms from May to July. Stalks 1 1/2 to 2 feet high, flowers from 4 to 6 inches across, throat at heart a golden-yellow, melting suddenly to a tawney orange-brown which shades lighter at the crinkled edges, and there is a fine line of yellow down the center. This color goes well with all yellow-green foliage.

**FLAVA.** Same as Fulva, save the flowers are a clear, full, lemon-yellow, called Lemon Lily.

**DUMORTIERI.** Similar colored plant and flower. Stalks 6 to 8 inches high with 8 to 12 buds on each; flower 2 to 3 inches across, not large, but a pure, intense, lovely golden-yellow, shading a trifle toward orange at edges. Flowers earlier and often has second lot of flowers.

**Price.**
Large clumps of roots, 15c each; $1.50 per dozen; $10 per 100.
warm soil; where frost gets into the ground, they require mulching or taking out of soil over winter. The flowers are not as large as the rhizomatous or root iris, but the colors are both more delicate and brilliant and the flowers have stiffer petals, keep longer and make a fine cut flower. YELLOWS, WHITES, BLUES OR ASSORTED COLORS.

Price.
Large bulbs, 10c each; 60c per dozen; $2.50 per 100; $15 per 1000.

AN IRIS BOOK. To all lovers of the Iris, and every one who loves flowers should be in that class, I advise sending 10 cents to the C. S. Harrison Company of York, Neb., for their "Iris Manual" describing the many varieties of this lovely flower, their culture, and wonders. He also gets out Manuals on "The Phlox," "The Peony," "The Evergreens," and "The Gold Mine in the Front Yard," which, if as fine as the Iris Manual, are worth getting also.

TIGRINUM SPLENDENS. This old-fashioned flower is a great favorite with many; it is of the easiest growth, gorgeously beautiful with its orange-scarlet flowers dotted with black, and perfectly hardy.

Price.
Large bulbs, 10c each; 75c per dozen; $5 per 100.

TIGER LILY

BANANA PLANTS

MUSA ORINOCO. If given plenty of water, the Musa or Banana, will grow luxuriantly as far north as Chicago and New York. Of course, where there are heavy frosts, it must either be replanted every year or taken inside and protected, but its foliage is so handsome and the plants can be grown so cheaply in the Rio Grande Delta that they are worth replanting every year in colder climates. If large, strong, 6 to 8-foot plants are obtained, they will probably blossom in their curious and beautiful manner, and perhaps bear a few fruit. They are so heavy that the weights are given and the plants are not delivered; large ones had better be freighted, small ones sent by express.

Price.
Suckers 2 to 4 feet high, 10 to 20 pounds, 40c each; $4 per dozen; $25 per 100.
Suckers 4 to 6 feet high, 20 to 60 pounds, 75c each; $7.50 per dozen; $50 per 100.
Suckers 6 to 8 feet high, 70 to 90 pounds, $1.25 each; $12.50 per dozen; $75 per 100.

BAMBOO

ARUNDO DONAX. A beautiful bamboo reed, attaining a height of 12 feet, growing readily where there is plenty of water, and hardy over all Middle States. In fall has a 3-foot long, lovely plume. Very showy as a background.

Price.
Large clumps, 30c each; $3.00 per dozen; $20 per 100.

PALM OR UMBRELLA GRASS

CYPERUS ALTERNIFOLIA. A graceful grass which looks like a small palm, grows readily, hardy, and makes a fine house plant.

Price.
For strong roots, 15c each; $1.25 per dozen; $9 per 100.

DASHEENS

COLOCASIA SP. There are more of the Chinese potatoes eaten than of the Irish potatoes. This is a handsome species of caladiums or Elephant's Ear developing edible tubers in the ground. It is worth planting as an ornament.

Price.
Tubers, 25c each; $2.50 per dozen; $15 per 100.

WHEN ORDERING DIRECT, BE CAREFUL TO WRITE NAME AND ADDRESS PLAINLY AND GIVE SPECIAL SHIPPING DIRECTIONS, IF ANY. WHERE NO SPECIAL INSTRUCTIONS ARE GIVEN WE WILL SHIP AS IS OUR USUAL CUSTOM.
NIGHT BLOOMING CEREUS

BURGEONS out into a 3-foot high cluster of wonderful cream colored bells. The flower is marvelously beautiful and the plant picturesque. Killed by frosts entering the ground, and north of North Texas should either be protected or taken inside. So heavy not delivered.

Price.
Small plants, $1.50 each; $15 per dozen.
Large plants, $3 to $5 each, according to size; not delivered.

SPINELESS CACTUS

OPUNTIA VULGARIS SP. This is claimed to be the great forage plant for arid regions. It is an interesting curiosity, native of Texas, where this variety will stand the winters, and at least down to 25 degrees. Must have good drainage, and slabs or leaves will keep almost indefinitely. Plant in dry soil and water sparingly. Grows from slabs.

Price.
Slabs, 45c each; $4.50 per dozen; $35 per 100.

ROSELINE

HIBISCUS SABDARIFFA. The American jelly plant. Will fruit at Houston and probably at Dallas; is ornamental further north. An annual requiring same care as cotton.

Price.
Seed, 25 cents per packet; $1.50 per one-quarter pound; $5.00 per pound.

CENTURY PLANT

AGAVE MEXICANA. This stately, stiff-leaved, architectural plant grows wild in the Rio Grande Delta, and sends its marvelous flower stalk from 8 to 15 feet high in the air after growing 7 to 10 years (not a century). Where frost enters the ground must be protected or taken inside in winter.

Price.
According to size from $1 to $5 each; not delivered.
Among the other things of which we are hopeful, there is a very lovely native iris, identified by the United States Department of Agriculture as a Pumila, which has been domesticated at La Granja. It has the wonderful, deep, yet vivid, colors of the pansies, with some strong mahogany browns of its own. Altogether

**SEND FOR OUR NEXT CATALOG AND INFORMATION BOOK**

We hope to make it contain so much information and so much better than this book that you will want it, and miss it if you do not get it.

Of course, we have found we cannot grow everything; dahlias, tulips and some lilies find our soil temperature too high for their best development. Hyacinths, and some others are still in the testing stage. But we can grow so many varieties of bulbs that

**WHY USE GERMAN OR FRENCH OR HOLAND BULBS WHEN YOU CAN GET BETTER BULBS GROWN IN THE UNITED STATES?**

Your dealer will have or can get our next catalog for you and orders can easily be placed with him. But we are always ready to give information and aid.

And in the varieties we have tested out, we have natural advantages which make it worth your while to get the La Granja bulbs.

Your Well-Wisher,
Eltweed Pomeroy
Donna, Texas, August 1, 1915.
MODEL CANNA BEDS.

Many lovely combinations can be made for canna beds; we are ready to advise when given the conditions. Here are for a few round beds. Place a stake in center, and using, a string 24 inches long, mark out the first row, and from that the second 24 inches from first, and a third 24 inches from second and so on. Plant the canna 18 inches apart in the row.

Beds 1 to 8 are 4 feet in diameter, and have one center canna and 6 around it of slightly lower and contrasting canna.

Bed No. 1, 50c—1 Mrs. Kate Gray, 6 Beacon
Bed No. 2, 50c—1 Atalanta, 6 Austria.
Bed No. 3, 70c—1 Wyoming, 6 Gustav Gumpper.
Bed No. 4, 70c—1 Louise, 6 Mt. Blanc.
Bed No. 5, 70c—1 Flambeau, 6 Venus.
Bed No. 6, 70c—1 King of Bronzes, 6 Florence Vaughan.
Bed No. 7, 70c—1 Italia, 6 Undine.
Bed No. 8, $1.20—1 Wabash, 6 Hungaria.

Beds 9 to 12 are 7 feet in diameter and have one center canna, 6 in second row and 12 in outside row, each lower than others, and contrasting colors.

ASSORTMENTS.

Many people would like to try an assortment of canna, and they do not know what to select. Here are a few of my selection, one of each variety put up in a package. I have selected none that are close together, and made specially low prices.

No. 1, Dollar Assortment—Twelve Old Favorites.

4 gorgeous reds, Pennsylvania, Joliet, Atalanta, Pillar of Fire; 2 superb oranges, Indiana, Wyoming; 2 lovely yellows, Austria, Mercedes; 2 flaming orange and yellow Allemania, Flambeau; 2 state-
yellow canna, Musafolia, King of Bronzes.

No. 3, Dollar Assortment—Nine Bronze Leaf Cannas.

4 glowing reds, King Humbert, Wm. Saunders, Carrol F. Read, Egandale; 2 gorgeous oranges, Wyoming, David Harum; 1 pink and 2 foliage Shenandoah, Majestic, King of Bronzes.
